### DETAILED ACTION

1. This application has been examined. The claims 1-20 are allowed.

#### *Reasons For Allowance*

2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a display device comprising a source signal line, a gate signal line; a common electrode; and a pixel comprising a switching element; a nonvolatile memory element; and a pixel electrode. The closest prior art of Tanaka et al. (US 2001/007447) showed a similar invention; however, they fail to teach that wherein a input terminal of the switching element is electrically connected to the source signal line; an output terminal of the switching element is electrically connected to the pixel electrode; the nonvolatile memory element is electrically connected between the pixel electrode and the common electrode as claims 1-12, or an output terminal of the first switching element is electrically connected to an input terminal of the second switching element and the pixel electrode; a control terminal of the first switching element is electrically connected to the gate signal line; and the second switching element is selectively connected to one of the capacitor element and the nonvolatile memory element as claim 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
